# What is a 3D world?

- 3D includes the design and development of 3d models with the help of 3d CAD software. Our main motive is to focus on real-time problem-solving and make real-time innovative products.
- In this program, we help students to take a step towards working with technology professionally and learn important industry skills within engineering, IoT, and data processing

<b>Class</b>	<b>Project/Activity</b>	<b>Understanding/Learning</b>
1	Introduction to 3D World technology	Shape identification with real-life scenes
2	Key chain	Alphabet orientation
3	Dice	Shape orientation
4	Sword	Ancient craftsmanship vs modern craftsmanship
5	Finger ring	Jewelry design basics
6	Snowman	Cartoon figures designs
7	Home decoration	Architect basics

8	Bicycle	Motion and mechanics concepts
9	Space shuttle	Astronomy understanding
10	Tower of Pisa	Historical architect understanding
11	Gun	Artillery design basics
12	Pyramid	Ancient architect
13	Penguin	Cartoons design basic understanding
14	DNA design	Design curves understanding
15	Monument	Architect basics
16	Submarine	Marines design basic
17	House	Architect home design
18	Racing car	Automobile designing basics
19	Solar system	Astronomy science
20	Robotic Car	Robotics design basics
